Adithya Séan Bandara Ekanayaka

Passport: PW6269341 | **Date of birth:** 04/01/2003 | **Place of birth:** Dublin, Ireland |

Nationality: Sri Lankan, Irish | **Sex:** Male | **Phone:** (+94) 702967909 (Mobile) | **Email:** adithyasean@gmail.com | **Website:** https://adithyasean.github.io | **Website:** https://huggingface.co/adithyasean | **Website:** https://www.credly.com/users/adithyasean | **LinkedIn:** adithyasean | **Whatsapp Messenger:** +94 702967909 |

Address: 36/3, Wehera Kanda Road,, Beddagana, Pitakotte,, 10100, Sri Jayawardenepura Kotte, Sri Lanka (Home)

ABOUT MYSELF

Professional Summery

Highly motivated Software Engineering undergraduate with hands-on experience developing innovative solutions using machine learning, modern frameworks. My experience spans various AI/ML domains, including NLP, computer vision and architecture, culminating in contributions to a Singlish conversational LLM as a finalist (top 8) in a Commercial Bank hackathon (partners: Google, IBM, Huawei). Other projects include a machine learning-based career guidance system, an attendance marking system based on vision computing for Sri Lanka Telecom, and a human-following robot utilizing computer vision. I am eager to contribute to cutting-edge AI research and development and further refine my skills.

SKILLS

Technical skills

Python | Java | C++ | C# | JavaScript | CSS | HTML | php | SQL | Node js | Jupyter | LLM fine-tunning | Spring (Spring Boot, Spring MVC, Spring Security, Spring Data) | React (Intermediate) | Kubernates | Pytorch,Tensorflow | Microcontrollers (Arduino - PIC) | Oracle database | Git | AWS | OCI | Azure | GCP | Python FastAPI | Docker

Concepts

Microservices Infrastructure | Generative AI | Linux | Machine Learning | project management | Cloud Computing | Robotics | Computer Networking | Object-Oriented Programming | Data Structures and Algorithms | IT Management Practices | Digital Image processing | Internet of Things | embedded systems

PROJECTS

04/08/2025 – 12/09/2025

Rootcode Tech-Triathlon 2025 Finalist

Selected as a finalist among the top 8 teams at the **Rootcode Tech-Triathlon 2025**, a national competition that attracted over **150 teams** and **1000 participants**. As a member of **Team Eden**, I contributed to a multi-stage challenge spanning engineering, AI, and UX design. This experience honed my skills in rapid prototyping, collaborative development, and end-to-end product creation under intense time pressure.

11/02/2025 – 11/08/2025

Realtime Attendance Marking System for Sri Lanka Telecom

Real-time face recognition attendance marking system

Engineered a real-time face recognition attendance system for **SLT Sri Lanka Telecom**, a comprehensive **IoT solution** designed for streamlined workforce management. The project leveraged a full-stack architecture, including a robust backend built with **FastAPI** and **Python** for API logic and data processing. The face recognition model and embedded device integration were handled using **C++** for optimal performance at the edge. On the frontend, an interactive dashboard was developed with **React**, allowing for easy monitoring and management. The system seamlessly integrated **cloud computing** and **edge computing** to ensure reliable, scalable, and secure operations.

14/05/2024 – CURRENT

Commercial Bank International Hackathon (Top 8 Finalist)

Lead a team to develop a Singlish chatbot, earning a finalist position (8 teams) out of nearly 30 teams in the International Hackathon organized by **Commercial** bank with technical partners **Google**, **IBM**, **Huawei**. This project utilized the latest **LLAMA** 3.1 8B model, employing pretraining, fine-tuning, and parameter-efficient fine-tuning (PEFT) techniques using LoRA. Hardware optimizations were implemented with Unsloth and Adam. The chatbot is designed to understand and generate responses in Singlish, addressing the unique linguistic nuances of this language. This achievement demonstrates expertise in large language models, fine-tuning methodologies, and the ability to deliver impactful solutions under competitive time constraints.

12/2024 – CURRENT
Next Step Career Guidance System

Developing a career guidance system using **microservices architecture** with **Spring Boot** to ensure scalability and flexibility utilizing **docker** and **kubernetes**. The system integrates **machine learning models** to provide personalized career recommendations based on user preferences, skills, and market trends. Designed to streamline career decision-making for students and professionals.

18/07/2024 – 01/08/2024
Enhanced and Intelligent Vision for Security Cameras

This project focuses on improving the performance of security cameras under unfavorable lighting conditions and with low-cost equipment. It is designed to ensure better face detection and recognition by applying image processing techniques. By using OpenCV's lightweight cascade classifiers instead of AI-based models, the program achieves greater efficiency, making it well-suited for devices with limited processing power.

Link https://github.com/AdithyaSean/Enhanced-Security-Vision

04/2024 – 08/2024
Human Following Robot

Developed a low-cost, autonomous robot utilizing a repurposed smartphone as the main controller. Successfully implemented the OpenBot project to build a functional robot, demonstrating proficiency in robotics, electronics, and software development. Explored the potential of leveraging existing technology for innovative applications.

04/2024 – CURRENT
School Management System

A modern school management system with various educational tools focusing Sri Lankan government schools.
Designed to improve learning effectiveness by helping to transition to modern learning from traditional learning methods.

EDUCATION AND TRAINING

28/08/2025 – CURRENT Colombo, Sri Lanka
SOFTWARE ENGINEER Araaya Business Solutions

11/02/2025 – 11/08/2025 Colombo, Sri Lanka
INTERN SOFTWARE ENGINEER Sri Lanka Telecom

Developed a real-time face recognition attendance system with hybrid attendance marking capabilities.
- project management
- research
- development

11/2024 – CURRENT Colombo, Sri Lanka
BSC (HONS) COMPUTING (AWARDED BY COVENTRY UNIVERSITY) National Institute of Business Management

Website https://www.nibm.lk

2023 Colombo, Sri Lanka
HIGHER NATIONAL DIPLOMA IN SOFTWARE ENGINEERING National Institute of Business Management

Website https://www.nibm.lk |

Field of study Robotic Application Development, Programming Data Structures and Algorithms - 1, Enterprise Application Development - 2, Advanced Database Management Systems, Digital Image Processing, Statistics for Computing, Data Warehousing and Data Mining, Mobile Application Development, Internet of Things, Machine Learning for Artificial Intelligence, Software Security, IT Management Practice, Innovation and Entrepreneurship Project, Industrial Training, Effective Communication Skills - 2, CREST

2022 Colombo, Sri Lanka
DIPLOMA IN SOFTWARE ENGINEERING National Institute of Business Management

Website https://www.nibm.lk/ |

Field of study Introduction to Computer Science, Mathematics for Computing, Programming Fundamentals, Electronics and Computer Architecture, Object Oriented Programming, Database Management Systems, Computer Networks, GUI Application Development, Software Engineering, Enterprise Application Development - 1, Developing Modern Web, Operating Systems, Business Solutions Development Project, Effective Communication Skills - 1

CERTIFICATES

07/2024
Oracle Cloud Infrastructure 2024 generative AI Certified Professional

The Oracle Cloud Infrastructure 2024 Generative AI Certified Professional certification validates expertise in building, deploying, and managing generative AI solutions using Oracle Cloud Infrastructure (OCI) services. It demonstrates a strong understanding of large language models (LLMs) and practical skills in applying them to real-world use cases.

14/06/2024 – CURRENT
Google Developer Program

Active participant in the **Google Developer Program**, staying up to date with the latest technologies, tools, and best practices in software development. Engaged in learning opportunities and community events to enhance skills in areas like **cloud computing**, **AI/ML**, and **web development**.

Link https://g.dev/adithyasean

2024
IEEE Student Member

Was a member of **IEEE**, participating in global tech events and competitions. Preparing to compete in **IEEExtreme 18.0** in October 2024, an international 24-hour programming challenge, to enhance problem-solving skills and engage in real-time collaborative coding.

LANGUAGE SKILLS

Mother tongue(s): **SINHALA**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C1	C1	C1	C1

Levels: A1 and A2: Basic user - B1 and B2: Independent user - C1 and C2: Proficient user

HOBBIES AND INTERESTS

Chess | Table Tennis | Machine Learning

Passionate about strategic thinking and continuous learning, I engage in chess, table tennis, machine learning projects. These hobbies showcase my analytical skills, precision, and adaptability.

RECOMMENDATIONS

Dr.Thisara Weerasinghe Professor

- Head of Computing at NIBM
